

PCEXPRESS

Proximity Badge Time Clock

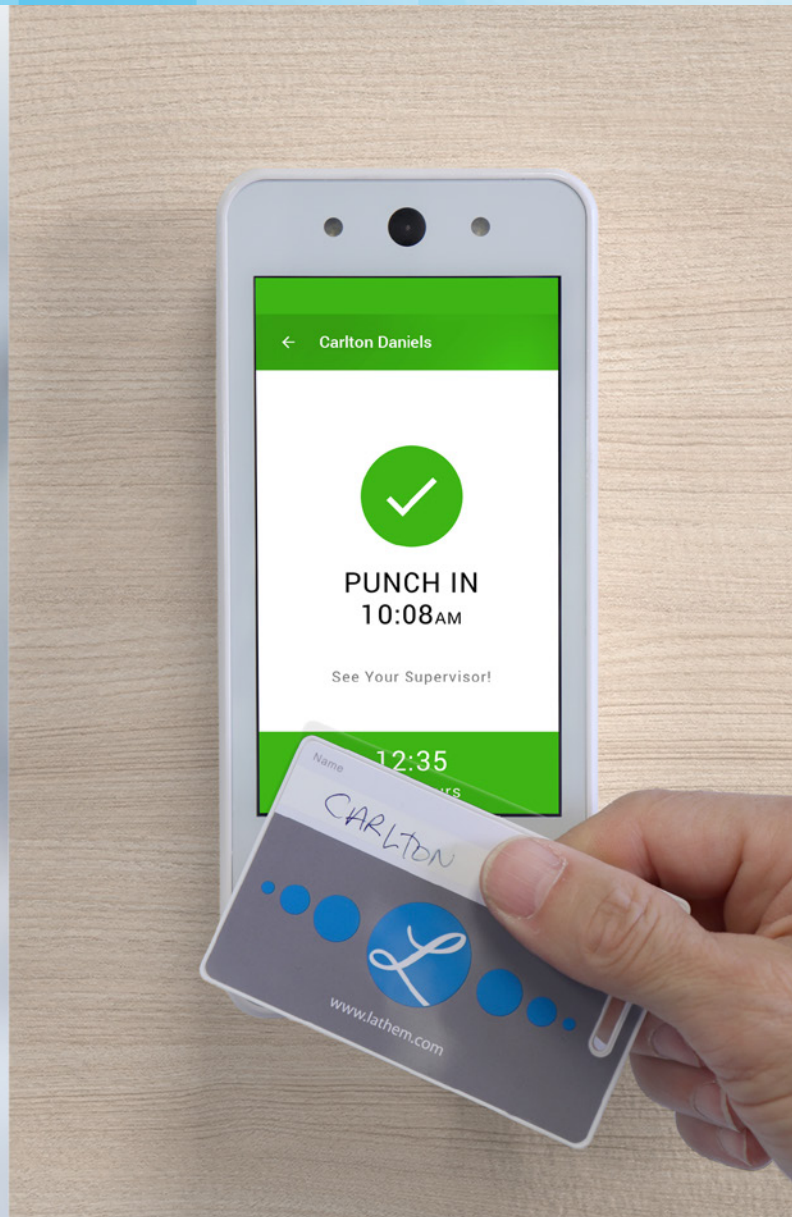

Clock-in with the wave of a badge.

Easily record and manage employee time and attendance with the touch of a finger or the wave of a badge. Lathem's new PCEXPRESS time clock has a modern 5" LCD touch screen interface that allows employees'

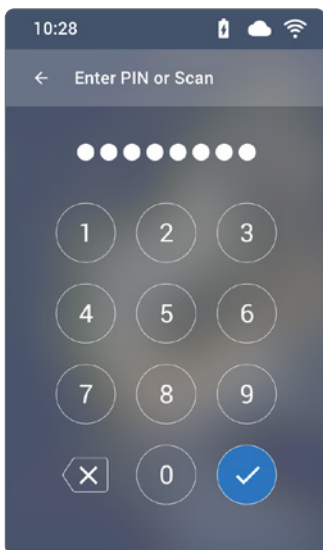

to clock in & out, check their totals, change departments, add amounts, and more. Supervisors can easily manage daily timekeeping requirements at the clock as well. Adding employees and editing punches are easy, and just a few of the many features available. The PCEXPRESS has built in WiFi, so data is sent in real time to Lathem's PayClock time & attendance cloud-based software, where you can access and manage employee time card info at anytime, anywhere, via your secure web portal account.

A paid subscription to Lathem's PayClock web-based time clock software is required and sold separately.
