

## Law and Order: Crime Prevention Agency ATL Uses Lathem's Cloud-based PayClock® Online and FaceIN® Time and Attendance Solutions to Keep Employees Accountable and on Task

### Overview

Crime Prevention Agency ATL provides private security services to companies and individuals throughout Atlanta. With a staff of current and former law enforcement professionals and highly trained security officers, Crime Prevention Agency ATL has 32 employees providing services such as business and residential community protection, private executive security, & helicopter/vehicle/motorcycle patrol.

### Business Challenge

Around the clock schedules that vary from employee to employee and work site to work site demanded a management tool to efficiently track and record employee locations and time records. Crime Prevention Agency ATL needed to prevent a few employees from clocking in from non-work locations, and eliminate colleagues clocking in for them.

### Business Solution

After reviewing multiple products in the marketplace, Crime Prevention Agency determined Lathem's PayClock® Online solution with FaceIN® time clocks as the best time and attendance system available.

Mark Veazey, Sr., owner at Crime Prevention Agency ATL, said, "I spent a good bit of time researching all the products out there in the market, and I found Lathem's PayClock Online and FaceIN time clocks were the ones that best suited our needs."

## SUCCESS STORY

### CRIME PREVENTION AGENCY ATL

"With PayClock Online's mobile GPS tracking feature, we know exactly when and where our employees are clocking in," said Heidi Hintz, operations manager at Crime Prevention Agency ATL. "It makes us more available to focus on other areas of the business."

The mobile features included in PayClock Online have a unique value proposition: a GPS location tracking element. Employees use a smart phone or tablet that is kept at each work site. The optional GPS tracking feature is able to record where employees are and when they clock in and out on these devices.

"We know exactly when and where our employees are clocking in," said Heidi Hintz, operations manager at Crime Prevention Agency ATL. "It makes us more available to focus on other areas of the business."

In addition to PayClock Online, Crime Prevention Agency ATL uses Lathem's FaceIN facial recognition biometric time clocks at a few client sites. FaceIN's fool proof 3D-imaging technology identifies individuals and clocks them in in less than two seconds. It's the most reliable biometric system currently available.

With PayClock Online, management doesn't need to be in the office, either. Time and attendance records can be accessed from anywhere, anytime with an Internet connection.

Hintz said, "When we tell our clients we use PayClock Online, they are sold on our business! Our clients love that we are ensuring our employees are exactly where they're supposed to be at the correct times and on task." PayClock Online saves Crime Prevention Agency ATL time and money, too. "We don't have to check in on our employees all the time anymore," Hintz said. "PayClock Online does it for me. And it used to take me days to do payroll; now it only takes an hour."

### Results

Lathem's PayClock Online offers key benefits:

- Cloud-based: data is available anytime, anywhere with an Internet-connected device
- No software to install or maintain
- Option to record and map where and when employees are 'on-the-clock'. Remote employees can clock in or out only when their smartphone has GPS location coordinates enabled
- Exports to popular payroll software

**PayClock Online**  
Cloud-based Time & Attendance System

**PayClock Online GPS tracking feature:**

Record and map where & when employees clock in and out on mobile devices.
