Time & Attendance Solutions for Business

TIME & ATTENDANCE SOFTWARE

PayClock. Cloud-Based Time & Attendance Software

Now you can manage employee time and attendance from anytime and anywhere. All you need is a web browser and an internet connection to capture, edit and seamlessly integrate your workforce time and attendance data into payroll. Imagine the possibilities. Lathem's cloud based time and attendance software allows you to manage employee time sheets, calculate labor hour totals and export for payroll processing while out of the office, at home, business travel or even on vacation! You can give employees options to clock in/out using Lathem automated time clocks and record punches on mobile devices using the included PayClock app. Employees and supervisors can have on-demand access to view time sheet info; current in / out status; total hours; benefit time; as well as send and approve time off requests and much more!

Anytime. Anywhere.

Never any software to install or maintain. Runs on Lathem servers in the cloud.

Data is secured and backed up daily by Lathem.

Proximity Badge Time Clock

Easily record and manage employee time and attendance with the wave of a badge. Lathem's new PCPROX time clock has a modern 7" LCD touch screen interface that allows employees' to clock in & out, check their totals, change departments, add amounts, and more. Supervisors can easily manage daily timekeeping requirements at the clock as well. Adding employees and editing punches are easy, and just a few of the many features available. The PCPROX has built in WiFi, so data is sent in real time to Lathem's PayClock time & attendance cloud-based software, where you can access and manage employee time card info at anytime, anywhere, via your secure web portal account. The system requires a subscription to Lathem's PayClock online software.

A Model PCPROX

Proximity Badge Time Clock System

- 7" capacitive touch screen employee and supervisor kiosk application.
- Employees can clock in/out using the proximity RFID card reader.
- Uses Ethernet, POE (Power-over-ethernet) or WiFi communication with encryption.
- Supports 1,000 employees & includes a built-in dry contact relay for bell ringing.
- Employees and supervisors can perform functions like entering tips, checking benefit time balances, and many more..
- Requires subscription to PayClock Online web-based time and attendance.
- Size: 5.38" W x 3.63" D x 12" H 1.6lbs. ABS Plastic Case.

ITEM#	DESCRIPTION
PCPROX	Touch Screen, Built In Relay & Badge Reader
RF-BADGE	Proximity Badges (pack of 15)
RFKEY-5	Proximity Key Fobs (pack of 5)
VIS6014	Operational Backup Battery

CloudTouch Fingerprint Time Clock System

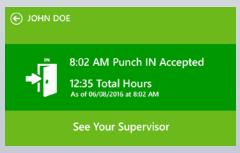

Now you can easily record and manage employee time and attendance with the touch of a finger. Lathem's CloudTouch time clocks have a modern 7" LCD touch screen interface that allows employees' to clock in & out, check their totals, change departments, add amounts, and more. Choose the CloudTouch time clock model that captures your employees time with a state-of-the-art biometric fingerprint sensor or proximity badge card reader. CloudTouch time clocks have built in WiFi, so data is sent in real time to Lathem's PayClock Online time & attendance cloud-based software, where you can access and manage employee time card info at anytime, anywhere, via your secure web portal account.

PIN Entry

You decide which employees and supervisors can use a unique PIN number in lieu of, or as a back up to, badges or biometric identification.

Employee Hours

The punch confirmation screen shows the employee the time they punched in/out, their total worked hours for that period and even messages from their supervisor.

Transfer Depts

Employees can easily choose from a customizable list of departments that automatically set the proper hourly pay rate.

B Model CT72

CloudTouch Time Clock

- All CloudTouch time clocks have a 7" Touch Screen LCD Display & RFID Card Reader.
- CloudTouch time clocks work seamlessly with Lathem's PayClock® Online employee time & attendance software.
- Using WiFi or Ethernet, CT clocks instantly deliver employee data to PayClock Online.
- Fingerprint reader in addition to the Touch Screen and Card Reader.
- Requires subscription to PayClock Online web-based time and attendance.
- CT72 Size: 9" W x 2.6" D x 6" H 1.9lbs. Plastic & Stainless steel.

Face Recognition Time Clock and Access Control System

FaceIN® biometric time clock system is a complete time and attendance solution that uses contactless optical face recognition technology to instantly identify employees. FaceIN time clocks provide a touchless, more hygienic alternative to other biometric systems, while eliminating "buddy punching" and the need for cards and badges. Employees simply look at the clock and within seconds they are identified and clocked in for work. FaceIN uses a standard Ethernet connection to your existing computer network. The FaceIN model CT74 also includes a built-in dry contact relay providing optional secure door access control to admit employees into secure interior locations. The system requires a subscription to Lathem's PayClock online software.

AUTOMATED SYSTEMS

Face Recognition

C Model CT74

Face Recognition System

- Uses fool proof face recognition technology to instantly identify employees.
- Provides contactless hygienic alternative to fingerprint readers.
- Eliminates "buddy punching" and the need for cards and badges.
- Uses a standard Ethernet connection to your existing computer network.
- Supports 1,000 employees & includes a built-in dry contact relay for access control.
- CT74 has two infrared cameras and three dimensional face recognition technology in addition to the 7" Touch Screen and Proximity badge reader.
- Requires subscription to PayClock Online web-based time and attendance.
- Size: 9.2" W x 4.3" D x 6.3" H 1.75lbs. ABS Plastic Case.

ITEM#	DESCRIPTION

Α

Top-Feed Basic Electronic Time Clock

The Model 400E provides accurate timekeeping for employees without making the clock-in and clock-out process complicated or difficult. The 400E supports any pay period and records the month, date, day of the week, and time with every punch. Most time clocks only provide the date or the day of the week, not both. With SmartClock technology, supervisors will never need to adjust the time or date due to power outage, Leap Year, or Daylight Savings Time. The 400E requires Lathern E14 time cards.

400E Sample Print

The Lathem 400E prints the day of the week, month, date and time.

Other Time Clocks

Competitive products only print day of the week or date.

A Model 400E

Top-Feed Electronic Time Clock

- Prints month, date, day of week and time with each punch.
- Auto top-feed alignment and print activation for easy one-hand operation.
- SmartClock™ technology keeps time, date and settings during power outages, and auto-adjusts for Daylight Saving Time and Leap Years.
- Optional printing of late arrivals and early departures in red.
- · Optional internal alarm signal or control external bell.
- Includes 200 time cards, 2-10 pocket card rack, 2-two-color ribbons & 2 keys.
- Time Clock Size: 8.38"H x 7.38"W x 4.75"D 3.4lbs. Cool Gray.

Tru-Align Electronic Time Clock & Stamp

The 1600E provides precise and accurate time. The Tru-Align[™] setting provides fast printing and perfect punch alignment. The 1600E is truly automatic as it never needs resetting because it automatically changes year, month and date with perpetual calendar until Year 2099. Even changes time automatically for Daylight Savings Time. As a time clock, the 1600E records employees' in and out times for payroll accounting. As a job clock it can track project time for accurate costing. And as a document stamp, the 1600E can print the date, time and preset messages on important documents.

Tru-Align SmartClock**

SmartClock
