

Good Medicine: Cornerstone Pediatrics Takes Control of Business with Lathem's PayClock® Online Time and Attendance Solution

Overview

Springboro-Ohio based Cornerstone Pediatrics knows that workforce and practice management isn't child's play. So when they sought to replace a flood damaged employee time clock with a new time and attendance system, they stayed with Lathem and products they could rely on.

Business Challenge

As Practice Manager, Angela Powell oversees a host of office management responsibilities, including tracking accounts receivable, HR, time and attendance and payroll, and physician credentialing.

As part of her duties, she supervises 15 hourly workers, mostly office staff and nursing personnel, who are busy entering data into the practice's electronic medical record (EMR) system and taking care of patients.

When flooding in the office damaged their existing Lathem time clock, Powell was in search of a new employee time and attendance solution.

Business Solution

Cornerstone Pediatrics has been a longtime Lathem customer, so for a new time clock solution the Pediatric healthcare provider decided to purchase a Lathem PC600 time clock with PayClock® Online - Lathem's web-based time and attendance time clock system.

In the past to review employee timesheets and prepare payroll, Powell had to use a central computer which was shared by another employee - a process that was inefficient and inconvenient. She chose Lathem's PayClock Online because it lets administrators manage employee time records at any time and from anywhere.

This time and attendance elixir enables her to process payroll according to her schedule.

"We were happy with Lathem," Powell said, adding that the practice has been a longtime Lathem customer. "So when it was time to replace our time clock, we chose their online system that I could use whether I was at my desk or out of the office."

Employees now clock in by swiping a proximity badge in front of a new Lathem model PC 600 smart-touchscreen time clock. Their hours are automatically recorded, providing real-time viewing and the ability to make immediate changes, if necessary.

Results

"PayClock Online is dependable, reliable and easy to use," Powell said. "I'm able to edit missed punches and payroll requests in advance because I have the records accessible at my computer. It's much more time efficient on payroll day, cutting the process in half."

PayClock Online has enabled Cornerstone Pediatrics to manage employee time and attendance much faster and more efficiently than ever before.

And because PayClock Online has significantly reduced payroll processing time, Powell can focus on other office management responsibilities.

Benefits

Lathem's PayClock Online offers key benefits for Healthcare Providers in managing time and attendance, including:

- Process payroll anytime, anywhere, whether in or out of the office.
- Easily edit missed punches or payroll requests in advance.
- Reducing payroll processing time and integrating seamlessly with popular payroll systems like QuickBooks.
- Faster, easier and more accurate time and attendance management.
- Allow medical staff to view their own time records instantly.
- No additional software or network servers to maintain or worry about
